Day 1 -Thursday, October 7th 2021

09:00	12:00	Advocacy for cardiovascular diseases in Romania: steps forward or backward?
12:00	13:00	Opening ISEVS Congress 2021
13:00	14:30	Session A – Latest Breaking news on thoracoabdominal aneurysms and Type B Aortic Dissection (TBAD)
14:30	15:45	Session B – Latest on minimally invasive mitral valve surgery and novel transcatheter valve solutions
15:45	16:45	Session C – Aortic Valve Disease special session
16:45	18:50	Session D – Coronary Artery Disease special session

Day 2 – Friday, October 8th 2021

08:00	10:00	Session E - PCI vs. CABG	
08:00	08:15	Classical and special indications and contraindications for PCI and CABG	
08:15	08:30	Haemodynamical evaluation before PCI/CABG (FFR, iFR)	
08:30	08:45	PCI completing surgical revascularization – hybrid strategies (coronaropathy +- valves)	
08:45	09:00	PCI treatment of graft lesions	
09:00	09:15	PCI before and after TAVI	
09:15	09:30	PCI saving surgery (complications)	
09:30	09:45	Surgery saving PCI	
09:45	10:00	Discussion	
10:00	12:00	Session F - PCI solutions in classical CABG indications	
10:00	10:15	...which classical indications? (calcified lesions, bifurcations, restenosis, CTO, coronary aneurysms)	
10:15	10:30	Cutting/scoring balloons, high pressure balloons	

10:30	10:45	Rotational/Orbital atherectomy		
10:45	11:00	IVL (Shockwave)		
11:00	11:15	Laser		
11:15	11:30	Bifurcation techniques		
11:30	11:45	Aneurysm exclusion		
11:45	12:00	Discussion		

12:00	13:00	Session G- On surgery's border		
12:00	12:15	Recovering materials – peripheral		
12:15	12:30	Recovering materials – coronary		
12:30	12:45	Coronary perforation		
12:45	13:00	Discussions		

13:00	13:30	Lunch Break		
--------------	--------------	--------------------	--	--

13:30	15:30	Session H – Bypassing surgery		
13:30	13:50	LVADs and PCI		
13:50	14:10	MR interventional treatment		
14:10	14:30	TR interventional treatment		
14:30	14:50	PE and CTEPH interventional treatment		
14:50	15:10	Embolisations – materials and techniques		
15:10	15:30	Discussions		

15:30	16:15	Session I – TAVI		
15:30	15:45	Patient selection		
15:45	16:00	Alternate access ways		
16:00	16:15	Difficult cases		
16:15	16:30	Complications		

16:30	16:45	Session J – MitraClip		
--------------	--------------	------------------------------	--	--

16:30	16:45	Patient Selection		
16:45	17:00	MitraClip technique and difficult cases		
17:00	17:15	Complications		
17:15	17:30	Conclusions and discussions (Heart Team, Mixed operators team)		

17:30	18:45	Session K – Imaging		
17:30	17:45	The importance of stress echo vs. Cardiac stress test		
17:45	18:00	CoroCT - a valuable tool		
18:00	18:15	CT value in valvulopathies		
18:15	18:30	Echo expert on the boat – valvular implantation devices, before, after and during the procedure, Doppler for CABG		
18:30	18:45	Discussions		
20:00		GALA DINNER		

Day 3 – Saturday, October 9th 2021

08:00	09:00	Session L – Vascular access in PCI		
08:00	08:10	Femoral artery – antegrade and retrograde (echography's contribution)		
08:10	08:20	Distal access in AOMI		
08:20	08:30	Radial artery (benefits and possibilities, complications)		
08:30	08:40	Distal radial – the new kid in town		
08:40	09:00	Discussions		

09:00	10:45	Session M – CTO		
09:00	09:15	Patient selection and results		
09:15	09:30	Materials		
09:30	10:00	Antegrade techniques	Jorn Meekel	Amsterdam, Netherlands
10:00	10:30	Retrograde techniques	Stefan Smoorenburg	Amsterdam, Netherlands
10:30	10:45	Discussions	Jorn Meekel	Amsterdam, Netherlands

10:45	12:30	Session N – Exceeding the limits in HFrEf patients		
--------------	--------------	---	--	--

10:45	11:00	TAVR: till where?		
11:00	11:15	CABG in HFrEF: till where?		
11:15	11:30	Percutaneous treatment for HF: new devices		
11:30	11:45	LVADs – results on the long term		
11:45	12:00	Implantable devices interference with surgery – finding solutions: Cardiologist’s say	Grigore Tinica	Iasi, Romania
12:00	12:15	Implantable devices interference with surgery – finding solutions: Surgeon’s say	Marian Croitoru	Bucharest, Romania
12:15	12:30	Discussion		

Sponsor’s Simposia

10 minutes or more presentations which can be eventually integrated in the pauses

- 1. Stentys – Autoapposable stent***
- 2. Bioresorbable scaffolds***
- 3. M-guard***
- 4. Covered stents – Papyrus, Graftmaster, etc.***
- 5. Peripheral – SuperA, Viabahn, etc.***
- 6. Drug eluting balloons***
- 7. Protection devices***
- 8. The newest guidewires***
- 9. Microcatheters***
- 10. Catheter extensions***
- 11. CIN – Renal Guard***
